

SNOW GLOBE - tech specs

November 2024

Snow Globe is a 40 minute show for children and their adults, staged inside a giant, inflatable snow globe, featuring music, puppetry and snow. The show follows the story of Kent Rockwell, who gets lost in the snow, and befriends a giant bunny called Snowflake. The show ends with a spectacular snowfall of bubble mixture snow right over the audiences heads.

Snow Globe has been co-created by Niow (Nick Barlow) and Lachlan MacLeod - the team behind *The Super Amazing Dolphin Show*. The pair have many years experience performing and presenting theatre for families and young audiences, from Lachlan's recent work on *Bluey's Big Play* to Nick's tours with *Cirque Du Soleil*, and together, countless performances and workshops with companies including *Polyglot Theatre* and *A Blanck Canvas*.
